PROFESSIONAL SUMMARY

Full-Stack Developer with hands-on experience across Python, Java, SQL, and web technologies, backed by an MCA and a live client-facing project delivered end to end. Skilled in object-oriented programming, relational database design, Git-based version control, and debugging across the development lifecycle. Built and shipped 5+ applications spanning desktop, web, and AI/NLP domains — including a production website currently live for a business client. Seeking a Software/Python Developer role to apply strong fundamentals in data structures, REST-based application design, and full-stack delivery.

EDUCATION

Master of Computer Applications — Maharaja Institution of Technology, Mysore *2023 – 2025*
CGPA: 8.47 / 10

B.Sc. Computer Science, Physics, Mathematics — Government First Grade College, Nanjangud *2019 – 2022*
CGPA: 7.65 / 10

TECHNICAL SKILLS

- **Languages:** Python, Java, SQL
- **Web Technologies:** HTML, CSS, JavaScript, Django, PHP, Responsive Web Design
- **Databases:** MySQL, Oracle — DDL/DML/DQL, Subqueries, Nested Queries, Normalization, RDBMS Design
- **AI / Data Science:** Machine Learning, NLP, NumPy, Pandas, Matplotlib
- **Tools & Practices:** Git & GitHub (version control), Debugging, Unit Testing fundamentals, OOP (Abstraction, Encapsulation, Polymorphism, Inheritance), Data Structures & Algorithms, SDLC, Eclipse, XAMPP

EXPERIENCE

Freelance Web Developer — Sri Manjunatha Constructions (Client Project) *2026*

- Delivered a production-ready business website for a live client, achieving a fully responsive, mobile-first site now in active use, by building custom HTML/CSS/JavaScript layouts with integrated contact and consultation forms.
- Improved site usability and navigation clarity, measured by streamlined access to key service pages, by restructuring information architecture and implementing user-friendly navigation patterns.

Web Development Intern — MIT Ayurveda Medical College & Hospital *2025*

- Delivered a complete institutional website covering Home, About, Courses, and Contact sections, achieving a professional public-facing presence for the college, by independently designing and coding responsive pages in HTML, CSS, and JavaScript.
- Strengthened real-time development skills, measured by successful live deployment of the site, by gathering user requirements directly from college stakeholders and iterating on layout based on feedback.

Personal Projects — Python, Java, AI/NLP *2024 – 2025*

- Built an Intelligent Chatbot capable of human-like conversation, achieving natural-language query handling, by applying NLP techniques and Machine Learning models in Python.
- Developed a Hospital Management System supporting patient and record workflows, achieving reliable CRUD operations, by integrating Java with an Oracle SQL backend in Eclipse.
- Created a Weather Forecasting desktop application, achieving real-time weather lookups for users, by designing a Tkinter-based Python interface connected to live weather data.

CERTIFICATIONS

- Python Full-Stack Developer — Qspiders Software Testing & Training Institute, Mysore (2023)
- Java Programming with Mini Project — Ethnotech Academic Solutions (2024)
- Python Programming — GeeksforGeeks Online Certification (2024)
- Publication Certificate — MIT Ayurveda College Website (HTML, PHP, CSS) (2025)
